INDUSTRY EXPERIENCE

Freelance Web Developer | January 2021 - Present
• Approaching small businesses with possible improvements on their existing site.
• Building a good relationship with clients to better understand their goals.
• Creating UI/UX prototype designs, and adjusting those designs based on client feedback.
• Using HTML, CSS, PHP and JavaScript to develop landing pages.
• Utilizing GoDaddy's hosting and CPanel to bring clients' sites online.

Account Management/IT Analytics | webTactics
June 2017 – February 2020
• IT support/operations: user account creation and setup (via WordPress).
• Created HTML files to represent clients' hiring proposals.
• Edited PHP files and incorporated XML to upload through FTP.
• Worked with Excel spreadsheets to create company databases with MySQL.
• Problem solved/brainstormed new ideas with other software developers to improve the functionality and responsiveness of sites.
• Gathered data from Indeed and other hiring platforms to analyze and compile into reports for clients.

System Analyst | Bank of Montreal (Co-op)
May 2017 – August 2017
• Monitored alerts related to servers.
• Resolved minor server issues, i.e. unreachable servers and spikes in CPU.
• Contacted appropriate support groups to analyze and effectively resolve issues beyond my scope.
• Worked with zOS mainframe.
• Shadowed mainframe developers and learned how to program jobs.
